- Recruitment and Retention
- Stability Amid Uncertainty
- Strategic Planning
 - Seek Opportunities Responsibly

Economic Driver – Tariffs, Inflation & Interest Rates

The primary economic driver facing the County (and Country) is tied to the interplay between tariffs, inflation, and the Federal Reserve's response through the Federal Funds Rate (i.e. interest rates). This could result in **stagflation**, where we could see:

- **stagnant economic growth,**
- **high unemployment, and**
- **rising inflation.**

San Bernardino County Economy: Beacon Economics

January 2025

“Despite uncertainty... Beacon Economics is confident that the economy will stay on track in the near term and does not foresee a recession. **The outlook for San Bernardino County could change if... tariffs [are imposed] on key trading partners, triggering a trade war.”**
